

MOTBRUSH FEE PANEL tester

Functional description.

The MOTBRUSH FEE PANEL tester is used as a complete testing interface for the MOTBRUSH FEE LED panel. The tester provides the following functionality:

- Tests indicator LEDs over toggle switches over the proprietary communications connector.
- Acts as a power source for the panel – the tester is battery powered.
- Shows status of panel switches via LEDs (internal power and emergency status).
- Battery powered with USB micro rechargeable battery, more than 10 hrs of testing autonomy.

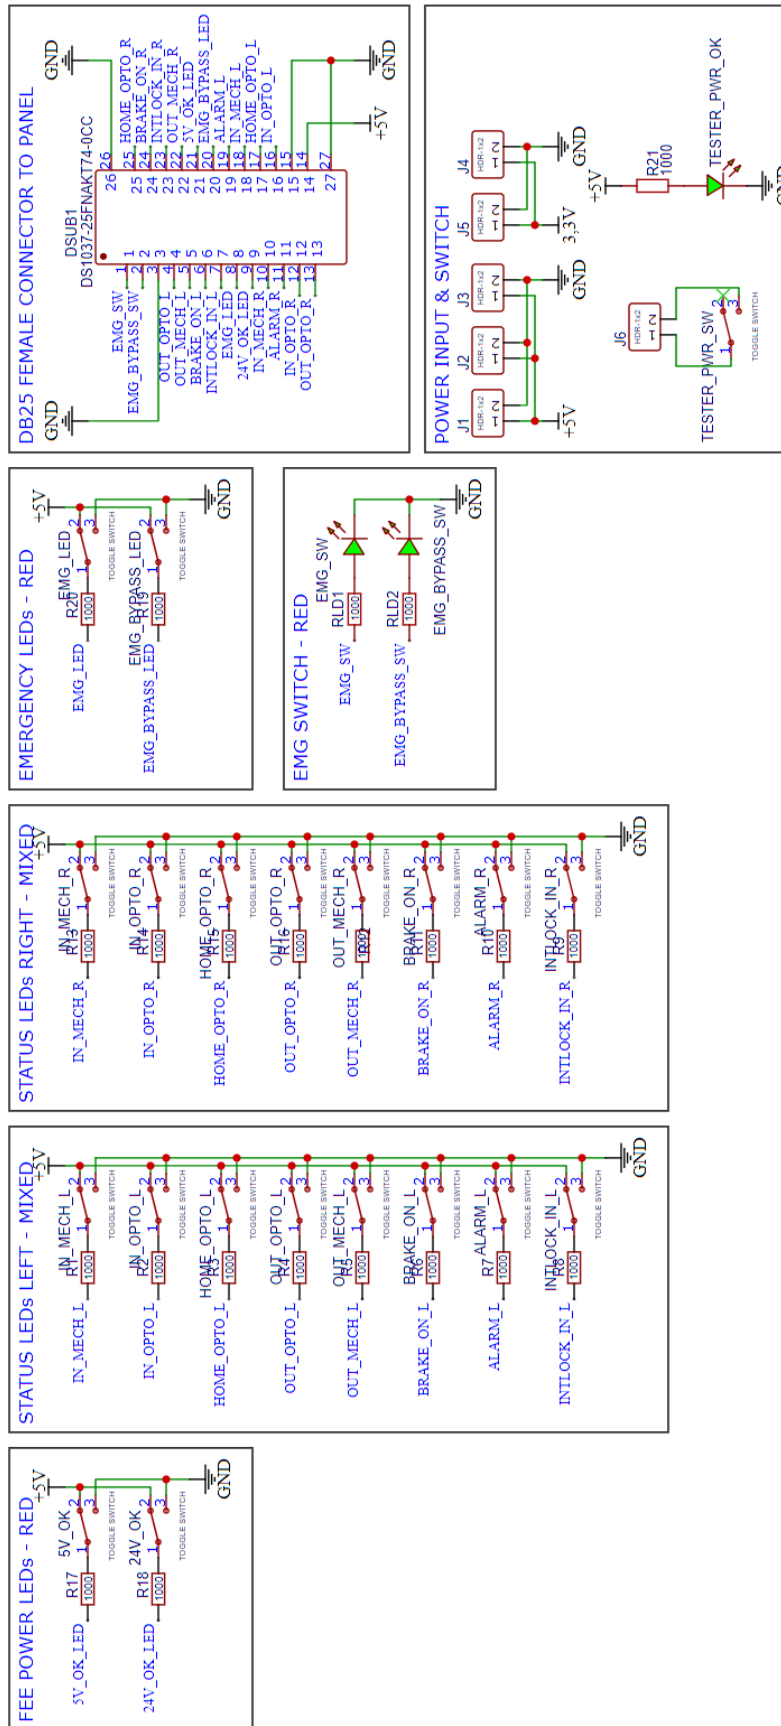

Technical specifications.

Power supply	Internal battery cca. 1.000 mAh, Lilon Rechargeable over USB micro connector
Functionality	Control and status signal interface Internally fused Gain control of the FEE via differential signals D-SUB 25 pin male panel mounted
Dimensions	180 x 150 x 60 mm

Weight

450 g

Internal schematic.
